

*My Neighbourhood Project*  
**Safer Internet**

Be careful about people you meet online.

Making new friends can be fun but some of them may lie.

**Dont tell anyone (other than your family) your personal information and your passwords.**

In this way you will be protected from malicious people.

**Make sure you improve yourself by the time you are using internet**

Plan your time carefully. Be carefull about the times you play games and you study.

**Beacause they usually contain inappropriate , infected or unnecessary information.**

Never read messages from people you dont know

The things you share on the internet are like your footprints.

**First think before you share something**
